## Dental Clinics

## Construction of Cabinets

### Standardization

Effective modular system that combined Flexibility in planning with exceptional functionality and quality to accept changing doors and drawers with different sizes at any time.

## Cabinets & Drawer Bodies

- Made with bent steel sheet structures from one integral part without welding and without connections or joints for added durability and to avoid the weaknesses at the joints. In order to be easy cleaning and sterilisable ensuring a special treatment and the surface is entirely painted.
- Sides are made of double wall steel sheet each at the left and right.  
The bodies are provided with 4 connection holes 2 at the right and 2 at the left lateral walls to screw the cabinets at the place of installation.
- Effective modular system with combined flexibility in coordination with exceptional functionality and quality to facilitate changing of doors and drawers with different sizes at any time.
- Body of drawers is made of steel sheet.  
Bottom and sides are fabricated from bent sheet from one integral part.
- Drawers front and sides are made with double wall sheet.

## Hinge System

### Yarmouk ... Pay attention to the Details

- Made in Austria
- Metal hinge, nickel plated 110 degree opening angle with integrated BLUMOTION .
- Free door to cabinet assembly and removal without any screw
- The new BLUMOTION closes cabinet door, silently and effortlessly, even when closed with undesired force.
- BLUMOTION provides perfect motion, bringing comfort to all. The adaptive system adjusts itself to the closing speed and the weight of the door.

- Full extension enables optimal storage space utilization and because they improve ergonomic workflows.
- Quiet movement and self closing. TANDEM ensuring smooth running action for the lifetime. Self-closing feature ensures the drawer complete closing
- Slow motion reduces the force required for closing. Adaptive system more than just dampening. This next generation of BLUMOTION reduces the forces involved in closing drawers and pull-outs to provide a quiet and easy closing movement .
- Durable and robust architecture to support the heaviest load. The bridge block design supports the runner system over the entire length of the opening and closing action. It provides a secure and controlled closing action even when fully loaded and it provides a precise gap capability.
- Ease of use and precise alignment. drawer assembly is just a matter of simple push . This gives you the advantage of fast , simple & accurate fitting , simple and precise way to adjust the front spacing .

## Drawers Runner System

Complete Solutions for  
All Types Of Laboratory Furniture

It's designed by CAD and digital-precision made. As a single unit it can be assembled freely with a better formation to fit into your lab space.
